

## SAP Cost Assessment

### Overview

Complex licensing, technology advancements, and the support matrix between internal and a variety of managed services, create hidden costs and missed opportunities. Crosstek's SAP Cost Assessment provides an in-depth review that identifies licensing concerns, hardware efficiencies, and support options to reduce costs and maximize resources.

### Service Highlights

Crosstek's team of SAP and infrastructure experts complete your assessment and deliver it in a report with do-it-yourself recommendations and a roadmap for realizing your cost savings.

- Software Licenses (SAP, Web Servers, Database, OS, HA, DR)
  - Consolidations, volume discounts, appropriate support level, usefulness
  - Licensing quantity and compliance
- Maintenance and Support Contracts
  - Right-sizing, elimination, consolidation, and maximizing utilization
- Hardware Costs
  - Right-sizing, performance, and reclaiming capacity
  - Modernizing data center and site-specific infrastructure
  - Sale and leaseback of hardware
  - Cloud migration and savings potential
- Optimize Support (Project, Production, and Managed Services)
  - Skills and coverage gaps and overlaps
  - Options for optimizing project and production labor

### Client Results

- Reclaimed capacity and improved system performance
- Avoided unnecessary capital expenses and licensing penalties
- Identified labor, licensing, and infrastructure savings through cloud migration

## *Your SAP Technical Experts*
